Ref: BICC-MS-Questionnaire

British International Championship Club Marking Station Questionnaire 2020

To: All BICC Marking Station Official's in Charge

Would you please read each question below and fill in the answers and return the questionnaire in the stamped addressed envelope provided.

Question	Please Answer Yes or No	Additional Comments
Would you be able and willing to continue and run your BICC marking station this season given that the virus may still be active during the racing period (ie to continue whilst within the social distancing period)		
Do you believe that your marking station facility will be available to us between the months of June to September of this year. (Please call them if that would help us understand the owner/operator's position)		
If yourself and the marking station would be available to mark pigeons this year, do you believe that you would be able to have the required number of marking station officials (please consult with them		

where possible to gain their feedback)		
Having read the BICC draft procedure, do you believe that it could be safely and practicably used at your marking station.		
Do you feel that you and your officials would be willing to work within the procedure and also use the PPE.		
Are you aware of any additional local requirements at your marking facility that we may have to consider in order to safely race mark pigeons at that location.		
Do you feel that there are any additional measures that should be incorporated into a procedure to be used when marking pigeons during the social distancing period.		
If your marking station could be operated in line with a social distancing procedure, do you think that this would require more time overall in order to basket the birds. If Yes, could you please give us your estimate as to how much longer. (Such that we can consider if the pick up times would be affected)		

Thank you for taking the time to complete the questionnaire, your feedback will be invaluable in allowing us to consider if we can safely race mark the birds for BICC races.
